

First Culivian

76

1776

1976

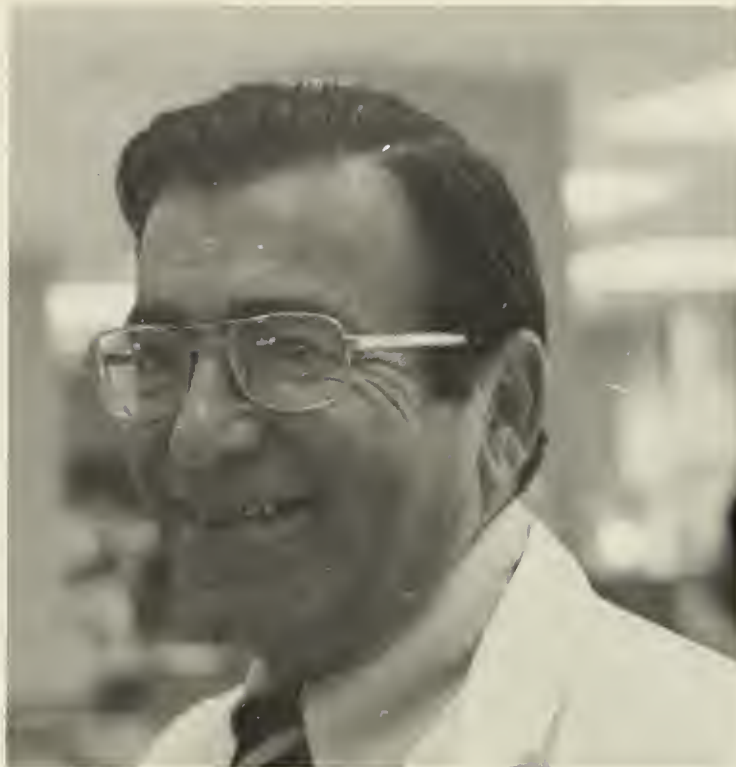

How can we explain the noted refusal of our Nation's Father to publicly expose his pearly whites? Many claim it was because he was condemned to wear a special denture which upon the slightest giggle might spring out of his mouth, or reveal the fact that his teeth actually belonged to a hippo.

This is fact, and it is also fact that 200 years ago Dentistry ranked lowest among all healing arts. There existed no Dental Schools, no form of organization or guidelines and no principles or precedent. Dentistry instead came from an assembly of barbers, tooth drawers, surgeons and charlatans. (Is it conceivable that Dr. Freeway was fighting for his space during those Dark Ages of Dentistry?)

Thus began American Dentistry; and it has been 200 years of American Dentistry that have made many aware of its vast future, 200 years of American Dentistry that have left many proud and some frustrated. It is through this yearbook that we wish to bring to light 200 years of American Dentistry.

A. Weisenfeld
J. Sher

DEDICATION

The man to whom this year's edition of our yearbook is dedicated brings to mind some words written by Miguel Cervantes, seemingly for him, when he said, "No man is more than another, unless he does more than another." For this is truly a man who has distinguished himself by doing more. This man is Dr. Jerome Zane.

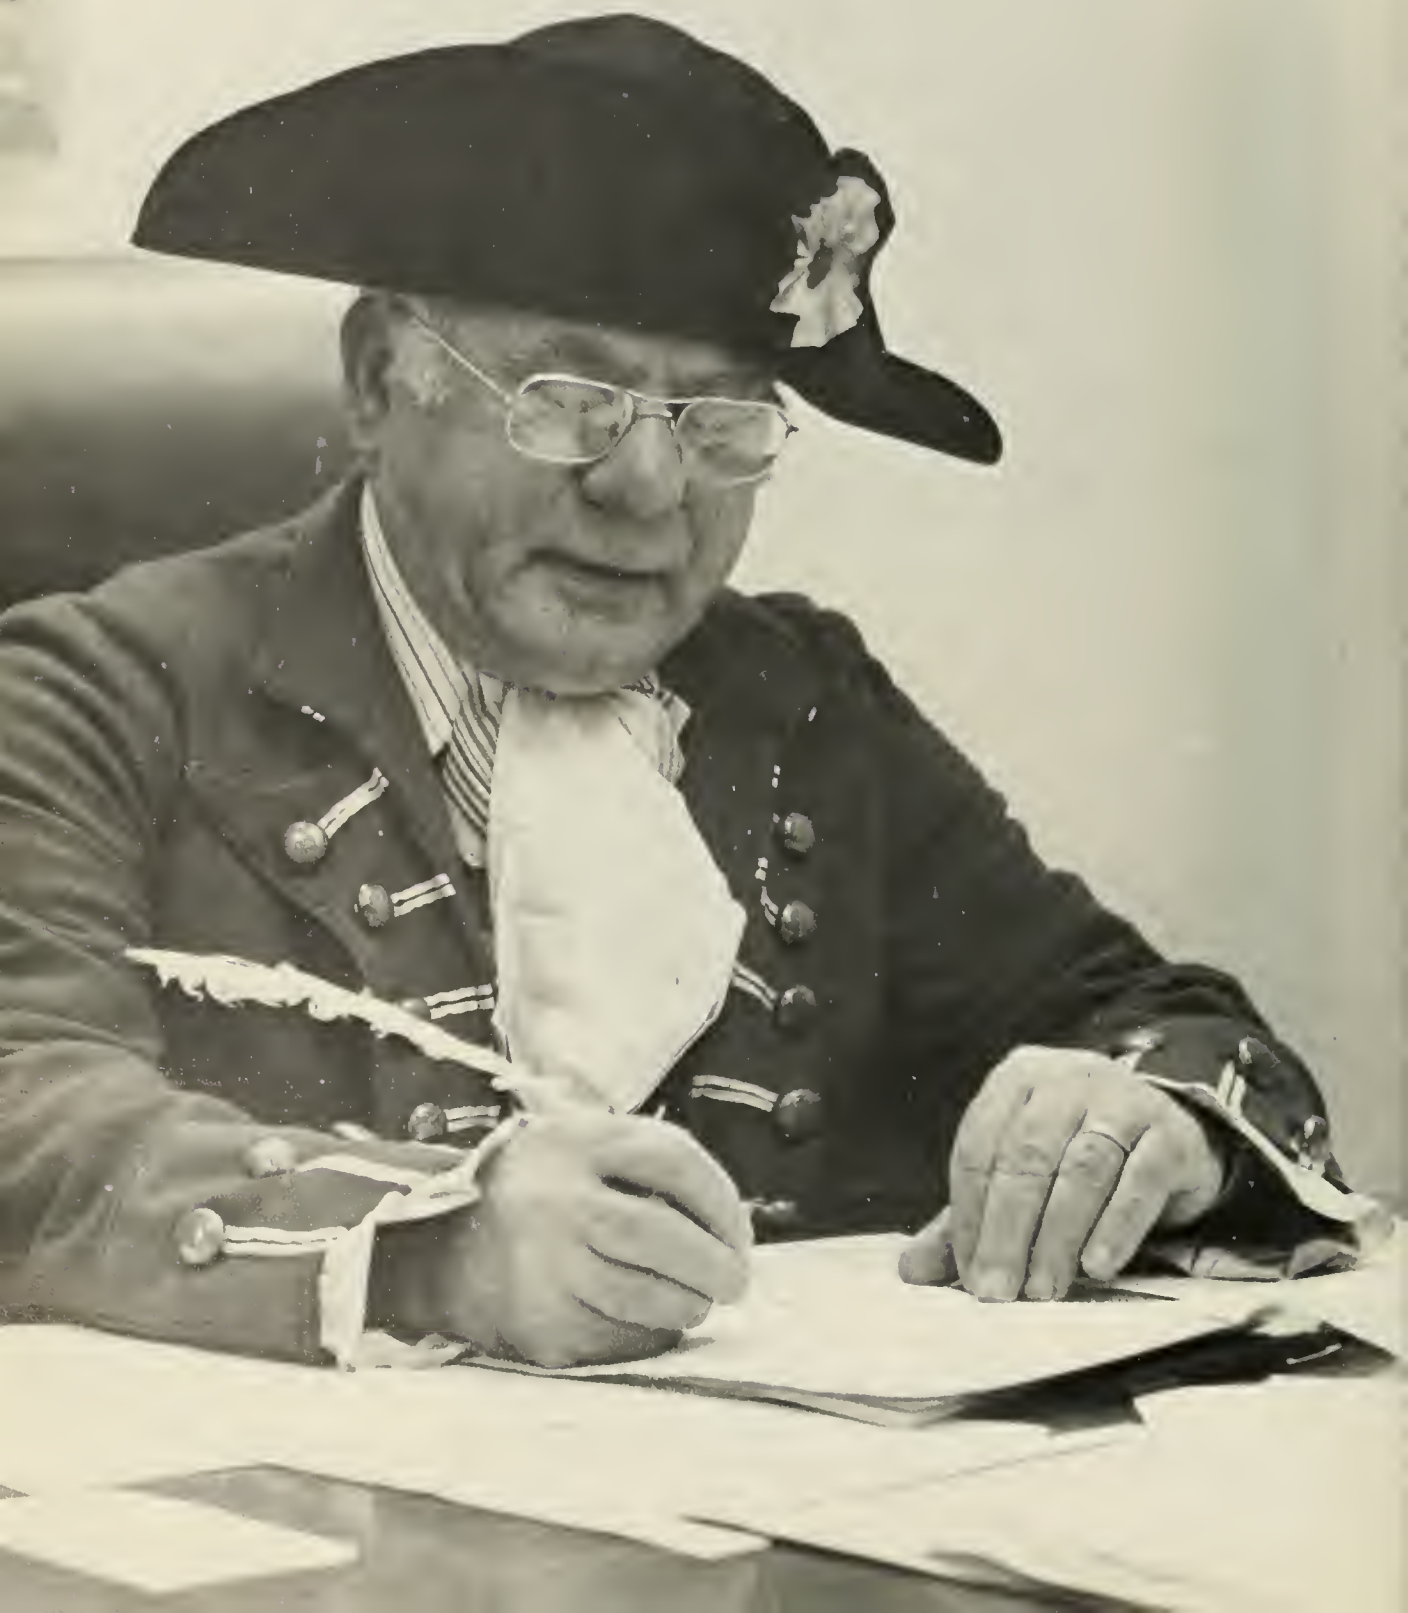

Dr. Zane has traveled a great part of our journey through school and he has continually demonstrated an acute awareness of both our clinical and personal needs. He has consistently encouraged us to strive for that highest degree of perfection which will someday help us approach excellence in our chosen profession. His unique manner of approaching our clinical uncertainties as a teaching experience with its main objective being comprehension and eventual perfection, have made all of us his gracious admirers.

It seems then natural that our memories of school have mention of such a special person.

Therefore, it is with a great deal of pleasure, gratitude, and honor that we, the graduating class of 1976, dedicate our yearbook to Dr. Jerome Zane, the teacher, the man, and our friend.

David Drohan

TO THE CLASS OF 1976

On behalf of the faculty and the supporting staff I extend to the Class of 1976 the happiest congratulations on having earned the degree of Doctor of Dental Surgery and I offer the warmest welcome as a full-fledged member of the dental profession.

Yours is an especially noteworthy class --- THE CLASS OF '76 --- THE BICENTENNIAL CLASS! But it is not the historical factor alone which clothes your class with a unique and memorable mantle! Rather, it is the pride with which we identify your class, based on superior scholastic attainments, mature professionalism and unselfish contributions to the community.

Forgive me however, for emphasizing that the happiness of graduation must be tempered with the realization that as a health professional you have inherited a huge responsibility, namely, that of constantly improving your knowledge and skills by a continuous program of on-going education, one which only ends with termination of life.

I am confident that our faculty has succeeded in firmly implanting the ideals of dentistry but what is more important, I have the utmost faith that your careers will create admirable reflections of dental education at Columbia University and that we will constantly derive pride from this Class of '76!

EDWARD V. ZEGARELLI, D.D.S.
Dean

REVOLUTIONARY HEROS

Cold Winter at Valley Forge

The Wisdom of Ben Franklin

The Craftiness of Benedict Arnold

The Strategy of Lafayette

The Dedication of Minutemen

In Clinic, May 17, 1976. The unanimous Declaration of

When in the Dental Course of inhuman events it becomes necessary for one module to dissolve the political bonds which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Reason and Reason's Pain entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self evident, that all students are created equal, that they are endowed by their Dean with certain unalienable Rights, that among these are Denture patients, Class Two, and the pursuit of a Diploma.

That to secure these rights, Modules are instituted among Students, deriving their unjust powers from the consent of Halpert, Uccellani, and Scrivani,

That whenever any Form of Clinic Government becomes destructive of these ends, it is the Right of the Students to alter or abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Education and Happiness. Fairness, indeed, will dictate that governments long established should not be changed for light and transient causes; and accordingly all experience hath shown, that students are more disposed to suffer, while patients are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Diploma evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Modules for their future security.

Such has been the patient sufferance of these Student Colonies; and such is now the necessity which constrains them to alter their former Systems of Clinic Government. The history of the present King of Module Clinics in a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these Modules. To prove this, let Facts be submitted to a candid alumni.

He has refused to permit us to wear sneakers on the clinic floor, yea too we must make fourteen trips to the supply desk every clinic period.

He has refused to permit us to populate the patient rosters with class two's and edentulous mandibles and maxillas.

He has created a multitude of faculty, and sent hither swarms of Dentists to harass our Students, and eat out their hearts.

John Quincy Kewez Peter Hancock
Andrew Washingteld

King Yano. Pubes III

The Wretched Modules of Columbia.

He hath raised our tuition without our consent.
He forceth us to adhere to unrealistic treatment planning
schedules.
He hath created ~~DDT~~ ^{DDT}.
He putted Dr McCollani and Dr Pandolfo in the same Module.
He maketh us scale teeth, that we know will only get
dirty again.
He forceth copper bands upon us.
He transports us to foreign special assignments.

In every stage of these Oppressions We have Petitioned for
Redress in the most humble terms: Our repeated Petitions have been
answered only by repeated injury. A King, whose character is
thus marked by every act which may define a tyrant, is unfit to
be the Director of a Free Clinic.

Nor have We been wanting in attentions to our Faculty
brethren. We have warned them from time to time of attempts
by them to extend an unwarrantable jurisdiction over us.
We have reminded them of the circumstances of their student sojourn
here. We have appealed to their native justice and magnanimity,
and we have conjured them by the ties of our common kindred
to disavow these usurpations, which, would inevitably interrupt
our connections and education. They too have been deaf to the
voice of justice and of consanguinity. We must, therefore,
acquiesce in the necessity, which denounces our Liberation,
and hold them, as we hold the rest of the school, Enemies in
School, after Graduation, Friends.

We, therefore, The Dental Class of 1976, One Module,
Assembled, appealing to the Supreme Judge of the School, Dr.
Fegarelli, for the rectitude of our intentions, do, in the
Name and by the Authority of the Good Students of these Modules,
solemnly publish and declare, That these United Students from
the Modules are, and of Right ought to be, Free and Graduated
to the Kaplan Crown, and that all Student affiliation between
them and the Dental School, is and ought to be totally dissolved;
and that as Free and Independent Dentists, they have the power
to Practice, Teach, and to do other Acts and Things which
Independent Dentists may of right do.

And for support of this declaration, with a firm reliance on the
protection of divine Providence, we mutually pledge to each other
our Lives, our Fortunes and our Sacred Honor.

EDMUND APPELBAUM, D.D.S.

1899-1975

IN MEMORIUM

We, the Class of 1976, with respect and appreciation remember Professor Edmund Appelbaum. He was our teacher. Joining the original school in 1926, he came to the School of Dental and Oral Surgery at the Medical Center in 1928. He persevered through the vagueries of the administration of nine Deans.

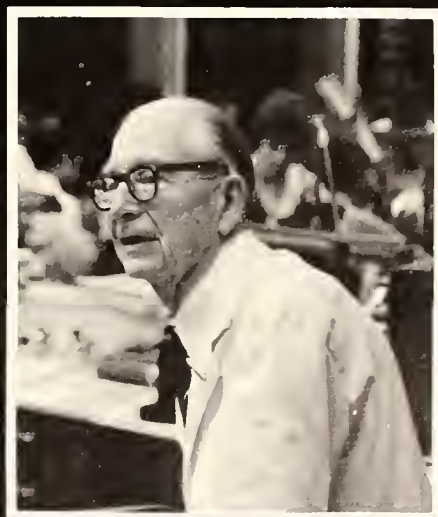

Great names in science shaped his career; Dr. Horace Wood — the eminent paleontologist, William Gregory, Milo Hellman, Charles Boedecker, Moses Diamond and Daniel Ziskind; and Dr. Appelbaum became a colleague of the great names in his field; Weinman, Schour, Gottlieb, Orban, and Kronfeld. Dr. Appelbaum became their respected equal.

Edmund Appelbaum loved dentistry, all of dentistry. One of his favorite stories relates how Balint Orban came upon him one day in the office he shared with Moses Diamond, as he was finishing an inlay casting. Eagerly seizing the piece, Orban said to Diamond, "How wonderful it is to find a histologist who can cast a perfect inlay."

He was unquestionably one of the first true dental scientists. He maintained, with Boedecker, the reality of the organic matrix of enamel, when the entire profession openly derided the concept. He founded the field of microradiography and his work in this field established the morphological basis for the current use of fluoridation to decrease the incidence of dental caries.

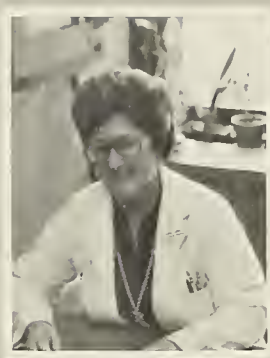

We knew Edmund Appelbaum in his twilight years. We knew a kind and helpful man who possessed a special insight into the problems of the learner. One would never know that this man, who always had enough time for each one of us, was the same man who helped to embed dentistry as a respected, scientific profession. The students of the School of Dental and Oral Surgery will miss and remember him.

Excerpts of the above are from the eulogy delivered by Dr. Melvin Moss.

"EXTRACTIONS" STAFF

200 years ago, Dean Zegarelli's Great Great Grandfather, Benjamin Frank Zegarelli II, signed for funds from the John Hancock Insurance Co. to establish a small dental clinic (and barber shop) on the upper west side. The endowment allowed young Benjamin the opportunity to purchase some dental chairs from Revere's Dental Supply, Boston, Mass. These chairs can be viewed still in use on the 9th floor clinic.

History repeated itself this past year when Dr. Zegarelli and Dr. Cain received a check for \$1,000,000 from the Samuel J. and Evelyn L. Wood Foundation, Inc. to help fund the new dental facility in Vanderbilt Clinic. Additional funds from HEW of \$4.5 million and \$2 million from New York State will enable these men to purchase chairs to last another 200 years.

center ad on p. 151 obtained with permission from "National Lampoon" 2/76

end page denture photo obtained from Vick/Clark reprint from "Smithsonian Magazine"

photographs of Revolutionary figureheads were obtained from special 1776 issue of "Time"

photographs of Early American Dentistry were taken at Smithsonian Institution by A. Weisenfeld

It is with great excitement that we announce the publication of a major work destined to stand as a classic in the field of art scholarship.

PRESENTING the 32-volume *Encyclopedia of Teeth in Art*, the result of the combined efforts of a score of the world's foremost art historians, critics, and educators working in conjunction with an international board of dentists, orthodontists, and dental technicians

Within its handsome simulated leatherette binding you will find literally hundreds of absorbing entries, such as

"The Root Canals of Venice" by Bernard Berenson

"Concerning Stubbs's Horses and Canines by Dore Ashton

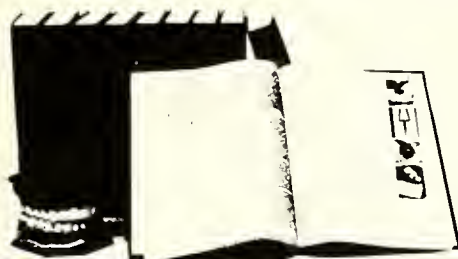

"Edward Hopper: Overbite or Underreach?" by Lloyd Goodrich

"Reexamining Cezanne's Brushwork" by Sir Herbert Read

All are readable, lucid, authoritative. All are accompanied by stunning reproductions of paintings, sculptures, and X-rays, many as large as 8 inches by 5 inches. A full 2,000 of the plates are in color. And the scope of the entries is truly broad, from "Hogarth's *The Seven Stages of Decay*" to "Seventeenth Century Colonial Paintings of Indentured Servants."

It is with no small amount of pride that we announce this to be the most complete study of its kind ever published, a 32-volume library and "gallery" for the home.

"Encyclopedic and definitive..." — *Saturday Review*

"A braeing accomplishment "

John Canaday, *New York Times*

"The most compelling tooth-history of art since Vasari's *Cupid and Psyche*."

John Rewald, *N.Y. Review of Books*

"Impacted with wisdom incisive "

Aesthetico Dentum

"Impressively complete... The entries on ancient Tartar plaques and brush enamels are highly sensitive and well-polished "

- * SEE US — IT PAYS!

We take pride in the job we do, so you can take pride in the job you do.

At Jelenko, we understand how you feel as you enter dental practice. Because it's the same feeling we have every day.

The urge to excel...the demand for quality. We take pride in the job we do, so you can take pride in the job *you* do.

Now, there are two ways to put Jelenko's expertise to work for you:

First, call our toll-free number, (800) 431-1785, to get in touch with a Jelenko expert. For technical assistance. For gold price quotations. For ordering. For scrap pickup (we'll even give you free containers and labels).

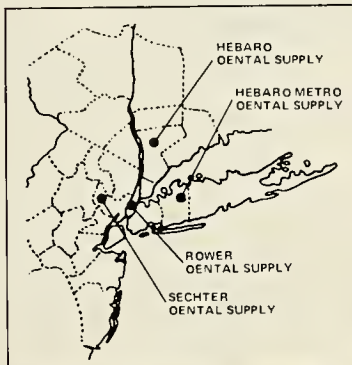

Second, take advantage of the educational courses at Jelenko's Regional Service Centers. Most are free; for a few, there is a modest fee.

We're working hard to keep Jelenko the leader in consistent, high-quality alloys for crown and bridge restorations and partial dentures.

And we're proud to be serving your profession...we hope we'll be serving you soon.

If building your new office is the first time these men worked together, you may be in trouble.

Constructing your professional office takes teamwork. Quite bluntly, its absence could cost you a bundle. But you can't know the pitfalls if you've never built or remodeled an office before. So here's a few tips.

You'll need . . .

- a registered dental architect experienced in such problems as patient flow, staff interfunction and administrative procedures
- a qualified interior designer skilled at blending minimum maintenance into dramatic yet functional aesthetics
- a trained specialist to advise you on just the right equipment to suit your specific operating procedures
- a certified builder to fulfill the design as you visualized it, on time and within budget
- a reliable service representative to promptly and courteously resolve any problems

That's the heart of the project. But, there's much more to contend with. So here's the best tip of all. Get a team of professionals right from the start. That's where we come in. We're experienced specialists in professional office design with every service you'll need right under one roof. One call gets us all. Contact us today for a free consultation.
